Plain Sheet Glass Ready Packed Boxes

Breakaway sheet glass is priced per square foot, plus any setup & crating charges. Each piece is poured to size and cannot be adjusted once made, so its best to make absolutely sure of your sizes before you confirm an order. The largest size we usually make is (200cm x 100cm) or (6ft x 3½ft) and the thickness ranges from 4mm for the smallest upto 7mm for the largest sheets, but this is completely dictated by the size of a given sheet, and the thickness of the glass doesn't correspond to its strength. Please note that as a thermoplastic material, sheet glass can contract by <1% from it's original poured size depending on your ambient working temperature.

Manufacturing times depend on the size of an order, but rarely take more than one week from it being confirmed & paid for to being ready to collect, although very large orders can sometimes take longer.

The vast majority of sheet glass is produced on an order by order basis, but we *usually* try to hold a few ready-packed crates of the following in stock to cover immediate rush orders, which are sold as complete boxes only;

- 8 x plain sheets of glass (6″ x 4″) or (152mm x 101mm)
- 8 x plain sheets of glass (5″ x 7″) or (127mm x 178mm)
- 6 x plain sheets of glass (A4) or (210mm x 297mm)
- 6 x plain sheets of glass (A3) or (297mm x 420mm)
- 6 x plain sheets of glass (12″ x 12″) or (305mm x 305mm)
- 4 x plain sheets of glass (24″ x 24″) or (610mm x 610mm)
- 3 x plain sheets of glass (36″ x 24″) or (914mm x 610mm)
- 3 x plain sheets of glass (100cm x 100cm) or (39-3/8″ x 39-3/8″)

We can ship our sheet glass (and variants) worldwide via road or air freight, but as a general rule sheet glass orders within England, Wales & Scotland are collected from us via direct collection arranged by the purchaser. Collected orders are packed into wooden crates to allow for transportation, but still need to be kept upright at all times.

BREAKAWAY LTD

Glass orders to be shipped internationally are further packed in a second sprung wooden crate, much like our patented ‘Boingy Box’ packing system, with a base pallet to keep the crate upright and allow easy transportation. This reduces the risk of breakages as much as is possible. Generally, shipping via air freight takes a day or so, but would be as far as the destination airport only. Road freight usually takes longer, but would be to your door. Please contact us if you require a shipping quote.
